## App Buku Python Flask CRUD Restfull API menggunakan SQLlite

Link: https://github.com/danilsyah/flask-restful-api-crud

## Penjelasan

Sebuah aplikasi CRUD (Create, Read, Update, Delete) sederhana cara mengimplementasikan restfull api / web service menggunakan Bahasa pemrograman python dan menggunakan framework Flask, untuk media penyimpanan data menggunakan SQLlite. Untuk menguji endpoint menggunakan aplikasi postman.

| Proses | Method | url endpoint                  | Body  |
|--------|--------|-------------------------------|---|
| Create | POST   | http://127.0.0.1:5000/books   | {     "title" : "data pertama",     "author": "danil",     "preview" : "bukuku" } |
| Read   | GET    | http://127.0.0.1:5000/books   |   |
| Update | PUT    | http://127.0.0.1:5000/books/5 | {     "title": "data pertama",     "author": "danil",     "preview": "bukuku" }   |
| Delete | DELETE | http://127.0.0.1:5000/books/5 |   |
